

## QSP2018-0006 Landscape Timber Installation

### Public Forum to Bidders Questions

#### Bidder's question

Good morning Nathan, I have a couple questions regarding this project. Received 12/20/18 @ 9:03 am

1. 1) 3/8 x 24 rebar stake. Do you want pins instead that have a head on them or not.
2. 2) is there any material going back in to the plots such as planting material, soil, after they are built?

Thanks,

Agency's response. Sent 12/20/2018 @ 9:24 am

Thank you for your email.

3. I think we are asking for the 3/8" x 24" rebar stake that will go through the overlapping joints, were applicable, and through the whole timbers in the spacing specified in scope of work. If you have pins that are equal to the 3/8" x 24" rebar and have a head on it? These can be reviewed by the Agency. You will need to send a picture showing that these fasteners are equal in size and in function to the 3/8" x 24" rebar.
4. Yes all extra soil will be placed back into the planting beds or relocated onsite to a designated area. Any plant material such as grass or plants will need to be hauled away and disposed of properly.

Thank You  
Nathan Bragg
